

Pick a Hand

Play a game by hiding something small in your hand behind your back. Show your child the object, like a coin or a pen, in your hand. Put it behind your back and change hands or leave it the same. Ask your child to guess which hand the object is in. Let your child hide the object and you guess.

Brainy Background Powered by Mind in the Making

When your child is guessing which hand the object is in, he/she is focusing, looking for clues and making predictions. This game helps build an understanding of math concepts. And taking turns is important!
